ALLEGATO C

Le Stazioni del Sistema di Monitoraggio internazionale

ALLEGATO D**Figura 1 Schema tecnico dell’NDC Italiano**

NDC Hardware Infrastructure
(INGV/MAE – Pinturicchio)

Figura 2

Figura 3

Figura 4

Didascalie (allegato D):

Figura 1: Schema a blocchi dell'infrastruttura *hardware* della porzione NDC residente presso la sede centrale dell'INGV di Roma. Un ricevitore satellitare e relativo computer di controllo, installati presso il Centro Elaborazione Dati, permettono il collegamento continuo con la CTBTO di Vienna. Una linea protetta in fibra ottica a larga banda, quindi, garantisce la connessione, con la necessaria riservatezza dei dati, con la sede dell'NDC di viale Pinturicchio.

Figura 2: Schema a blocchi dell'infrastruttura *hardware* dell'NDC situata presso l'Unità Tecnica Operativa del MAE di viale Pinturicchio. Una serie di *server* ed elaboratori dedicati svolgono le funzioni di acquisizione, controllo, elaborazione, visualizzazione ed archiviazione dei dati rilevanti di interesse dell'Autorità Nazionale.

Figura 3: Schema logico dell'applicazione sviluppata presso l'NDC e finalizzata alla gestione automatizzata dei bollettini inviati periodicamente dalla CTBTO, contenenti gli eventi individuati dal sistema di monitoraggio internazionale (IMS).

Figura 4: Schermata principale della nuova applicazione GIS in sviluppo presso l'NDC.
